

Greetings from a little town called Roseburg, Oregon.

Reference: Low Power FM (LPFM) and how it will effect our K-LOVE radio station (89.3fm)

It has been brought to my attention that the FCC is considering a process that "may" cause my (I say "our" because; my family is a monthly contributor and have been for several years) K-LOVE radio station to be removed from the air.

My family and I implore you to NOT implement such action. Or if you do... you implement procedures that will not effect the free dissemination of self-sufficient stations like K-LOVE.

K-LOVE serves my area effectively. I know of several families that contribute to and depend on this Safe, Effective and Moral radio station. This station is very effective in my Christian outreach for non-believers and believers as well. The music and commentary are safe for my children to listen to. In fact, I don't allow them to listen to any other radio station... It's K-LOVE or nothing! Please don't leave my family with nothing!

Robert Doyle and Family.
